

Acknowledgments

First of all, I want to thank Dr. Antoni Barba, tutor of this Thesis, for the fact of having conveyed me a lot of happy moments during the fulfillment of this work. Above all, I want to thank him for all his knowledge and advice that have helped me, and still do so much.

Thanks to the Universidad Veracruzana for having awarded me with a PROMEP grant (PROgrama de MEjoramiento del Profesorado) in order to develop my doctorate studies and elaborate this Thesis.

I also want to thank all my colleagues at the department of Enginyeria Telemàtica of the Universitat Politècnica de Catalunya (UPC), especially thanks to Dr. Sebastià Sallent for his very valuable support.

Thanks to Dr. Francisco Rico who bring me a friendly help at the beginning of my PhD studies and of course thanks to all my good friends of the Castelldefels section.

The development of this work includes some researches carried out in the NEC laboratory of investigation of Heidelberg in Germany, where I stayed for two and a half months with Dr. Marcus Brunner. He taught me all about the world of policies. Thanks to all researchers in the laboratory as well.

In the same way, a part of this work was developed in a period of two and a half months in the department of Computer Science of the University of Essex in England under Dr. Victor Callaghan's supervision. He taught me not only a very efficient work method,

but also how to enjoy a delicious cup of tea every day, which I still do. Thanks to all his team especially to Dr. Graham Clarke.

Thanks to Dr. Aiko Prass from the University of Twente in the Netherlands and to Dr. Stelios Sartzetakis from the University of Crete in Greece, for his Thesis Assessment to get the European Mention for this Doctoral Thesis.

Thanks to my wonderful husband. Thanks to my small but lovely family.

To Pepe
