Universitat de Barcelona

The impact of immigration on health, longevity and dependency of the elderly in the Spanish and European population

Aïda Solé i Auró

July 2009

Ph.D. Dissesrtation. Years 2005-2007
Program: Doctorat en Estudis Empresarials. Especialitat en Ciències
Actuarials i Financeres.
Directors: Dra. Montserrat Guillén i Estany and Dra. Eileen M. Crimmins

Agraïments

En primer lloc, vull expressar el meu agraïment a les meves dues directores per la seva dedicació, suport, confiança i paciència a l'hora d'elaborar la tesi doctoral. Vull agrair especialment a la Dra. Montserrat Guillén el seu guiatge en l'elaboració de la tesi doctoral i per obrir-me les portes al seu grup de recerca, i a la Dra. Eileen M. Crimmins per haver-me ofert la possibilitat de treballar amb ella en dues ocasions. Agrair-los-hi també l'experiència transmesa, les aportacions crítiques i constructives, i la motivació necessària per desenvolupar una activitat tant important com és la investigació.

Voldria donar les gràcies als membres del departament d'Econometria, Estadística i Economia Espanyola, especialment al seu director, el Dr. Manuel Artís, per l'ajut ofert i la cooperació perquè aquesta tesi s'hagi pogut desenvolupar. Concretament, agrair als membres del grup de recerca del *Risc en Finances i Assegurances* la seva col·laboració. Mencionar també a tots els membres del *Institut de Recerca en Economia Aplicada Pública i Regional*, per donar-me la possibilitat de participar i gaudir de les sessions de treball.

M'agradaria anomenar especialment a tota la meva família per haver-me donat suport en tots moments i per aprendre sempre de tots ells. Als meus pares, Isabel i Antoni, als padrins d'Arbeca, Montserrat i Jaume, al meu tiet Xavier, i a la meva germana, Núria. Especialment als meus amics i molt estimats Aina, Anna, Ferran i Mar per compartir els nostres somnis, esperances i una sincera i llarga amistat, i per estar al meu costat en els moments més complicats. Per tots vosaltres, el més sincer agraïment.

Als meus pares, Isabel i Antoni, i a la meva germana Núria

Contents

Chapter 1

Introduction and Motivation	1
1.1 About this dissertation.....	2
1.2 Gender differences in Health.....	7
1.3 Immigrants, a brief history in Spain and Europe.....	8
1.4 A brief history of the Health Care Usage in Europe.....	11
1.5 Longevity and dependency of the eldest population.....	14

Chapter 2

Gender differences in Health in 11 European countries: Results from the Survey of Health, Ageing and Retirement in Europe	19
2.1 Methodology	22
2.1.1 The SHARE Study	22
2.1.2 The Sample	23
2.1.3 Measures	24
2.1.4 Analysis	26
2.2 Results	27
2.3 Discussion	38

Chapter 3

Health of Immigrants in European countries	43
3.1 A literature Review	44
3.2 Data and Methodology.....	48
3.2.1. Data	48
3.2.2. The Sample	51
3.2.3 Methology	54
3.3 Results.....	54
3.3.1. Descriptive Analysis.....	54
3.4 Conclusions.....	60

Chapter 4

Health care utilization among immigrants and native-born populations in 11 European countries. Results from the Survey of Health, Ageing and Retirement in Europe	63
4.1 Data	68
4.1.1. The Survey of Health, Ageing and Retirement in Europe	68
4.1.2 The Sample	69
4.1.3. Measures	70
4.2 Methodology	75
4.2.1 Statistical Approach	76
4.3 Results	78
4.3.1 Regression Results	78
4.3.2 Impact of individual factors on health care utilization: immigrants versus native-born population	81
4.4 Discussion	85

Chapter 5

Scenarios for the impact of immigration on longevity and dependency of the elderly in the Spanish population	89
5.1 Data and methods	93
5.1.1. Estimation of health expectancy	99
5.1.2. Life expectancy, Sullivan's Method	102
5.2 Results	103
5.2.1. Composition of the Spanish population	103
5.2.2. Healthy and non-healthy life expectancy of the Spanish population.....	104
5.3 Discussion	107

Chapter 6

Conclusions	109
6.1 Main results	112
6.2 Improvements, Implications and Extensions	117
6.2.1. Substantive Value of Findings	117
6.2.2. Limitations	120
6.2.3. Policy Implications	121
6.2.4. Recommendations for further studies and related works	125
References	129
