

# Acknowledgements

I would like to express my gratitude to all the persons who have helped me these years along.

First of all, I wish to thank my supervisors, Mercè Ollé and Jordi Villanueva, for their teaching and support beyond their merely academic duties, for the uncountable many hours they lost with me, for their patience! I'll be in debt to both.

I also owe much to Pere Gutiérrez, he gave me good ideas and advices ...and always let me take part in his (usually wild) mountain-adventures.

And a lot of people: all the professors of the *Departamento de Matemàtica Aplicada I* here at the UPC, and those at the UB-UPC Dynamical System group: they never denied me neither their knowledge nor their time.

And last, but not least, I thank my buddies at the day-by-day work –specially my office-mates, Tomás Lázaro and Marta Peña–, for their support and friendship.
