

BIBLIOGRAFÍA

- [1] Astrom K.J., Elmqvist H., Mattson S.E.
“Evolution of continuous-time modelling and simulation”
Proceedings of the 12th European Simulation Multiconference (ESM'98)
SCS, The Society for Computer Simulation, Manchester, UK

- [.2.] Altman, Eugene; Brian, Andrew Frey (2002)
“Hydraulic Leveling Control System for a Loader Type Vehicle”
Patent U.S. Nº 6,389,953

- [.3.] Barth, John W. (Topeka, Kans. 1976)
“Mechanism for a loader bucket or forklift mast on a material handling vehicle”
Patent U.S. Nº 3.966.070

- [.4.] Broenink J.F., Kleijn Ch. (1999)
“Computer-aided Design of Mechatronic Systems using 20-SIM 3.0”
Proceedings of WESIC'99,
2nd Workshop on European Scientific and Industrial Collaboration, pag
27-34
Newport (S. Wales), UK, Sep 1999, Editors Roberts G.N., Tubb C.A.J.

- [5] Calvert, Robert W. (1985)
“Series Self-Leveling Valve”
Patent U.S. Nº 4,561,342

- [.6.] Casey, Todd (1998)
“Dual Self Level Valve”
Patent U.S. Nº 5,797,310

- [.7.] Cellier F. E.; Otter M (1995)
“Software for Modelling and Simulation Control Systems”
The control handbook (W. S. Levine, ed)

- [.8.] Darnell, P. A.; Kolk, R. A. (1990)
“An interactive simulation and control design environment”
Proceedings of the 1990 European Simulation Symposium, pp. 56 – 60
SCS

- [.9.] Diel, Robert McK; Huebert, James P (1985 - 1988)
“Series Self-Levelling Valve”
Patent U.S. Nº 4,408,518 and 4,723,478

- [.10.] Elmqvist, H (1975)
“SIMNON – An interactive simulation program for nonlinear system –
User's Manual”, Technical Report TFRT – 7502,
Department of Automatic Control, Lund Institute of Technology, Lund,
Sweden

- [.11.] Elmqvist, H (1978)
 “A structured model language for large continuous systems”
 PhD Thesis TFRT – 1015, Department of Automatic Control, Lund
 Institute of Technology, Lund, Sweden
- [.12.] Faraidoon, Fred Emanie; Brian Andrew Frey (2001)
 “Hydraulic Leveling Control System For a Loader Type Vehicle”
 Patent U.S N° 6,308,612
- [.13.] Friesen, Henry (Niagara Falls); Oka, Ken K. (St. Catharines)
 Canada (1996)
 “Combined loaded self-levelling and implement tilt linkages for effecting
 true level and enhanced roll back and dump characteristics throughout lift
 range loader”
 Patent U.S. N° 5.533.856
- [.14.] Garman, Anthony L. (Stevensville, Mich. 1988)
 “Loader boom mechanism”
 Patent U.S. N° 4.768.917
- [.15.] Geyler, Arthur H. (1995)
 “Hydraulic System For Bucket Self-Levelling During Raising and
 Lowering of Boom”.
 Patent U.S. N° 5,447,094
- [.16.] Graber, Homer R; Prairie Pretty; McFarland, James W.; Hutchinson,
 Kans (1971)
 “Hydraulic Self-Leveling Control For Boom and Bucket”
 Patent U.S. N° 3,563,137
- [.17.] Grace, A. C. W. (1991)
 “SIMULAB, An integrated environment for simulation and control”
 Proceeding of the 1991 American Control Conference, pp. 1015– 1020
 American Autom. Control Council
- [.18.] H. Lull, Le Grand
 “Loader”
 Minneapolis, Minn. (1962)
 Patent U.S. N° 3.070.244
- [.19.] Hairer, E; Wanner, G. (1991)
 “Solving Ordinary Differential Equations II – Stiff and Differential –
 Algebraic Problem”, Computational Mathematics N° 14
 Springer – Verlag, Berlin.
- [20] Karnopp, D.C.; Rosenberg, R.C. (1968)
 “Analysis and simulation of multiport systems”
 The bond graph approach to physical systems dynamics
 MIT Press, Cambridge, USA

- [.21.] Klein, A.; Gratz, U. (2001)
 "ITI – SIM: Modeling and simulation environment for intuitive and efficient analysis of fluid power components and systems"
 Proceedings of the 2nd International Workshop on Computer Software for Design, Analysis and Control of Fluid Power Systems, pp. 52 – 62,
 Ostrava Czech Republic
- [.22.] Mark Ginn, Ronald (Cary, N.C.); Brahman, Dana D. (Raleigh, N.C.);
 Leyda, Kirt D. (Topeka, Kans.) (2000)
 "Lift arm for a work machine having extended height and enhanced stability"
 Patent U.S. N° 6.116.847
- [.23.] Mitchell, E. E. L.; Gauthier, J. S. (1976)
 "Advanced Continuous language (ACSL)"
 Simulation, 72 – 78
- [.24.] Moffitt, John M. (Wichita); Youngers, Stephen A (Clearwater)
 Kans. 1997
 "Lift boom assembly for a loader machine"
 Patent U.S. N° 5.609.464
- [.25.] Murrenhoff, H. J. (1998)
 "Strumenti di progettazione computerizzati per sistemi a energia fluida, oleodinamica, pneumatica lubrificazione"
 Ottobre 1998, pp. 144 – 165, Italy
- [.26.] Parquet, Donald J.; Brown, Marvin L.; Pedersen, Carl O. (1976)
 "Self-Levelling System for Material Handling Implement"
 Patent U.S. N° 3,987,920
- [27] Seaberg, David H. (1974)
 "Hydraulic levelling circuit for Implement"
 Patent U.S. N° 3,811,587
- [28] Selfridge, R. G. (1955)
 "Coding a general purpose digital computer to operate as a differential analyzer". Proceedings 1955 Western Joint Computer Conference, IRE
- [.29.] Stacey, H. J. (1966)
 "Fluid System and Valve Assembly Therefore"
 Patent U.S. N°3,251,277
- [.30.] Strauss (ed), J. C. (1967)
 "The SCi Continuous System Simulation Language (CSSL)"
 Simulation 9, pp. 281 – 303
