Contents

1 Introduction **1**
- 1.1 Basic Notation and Terminology 1
- 1.2 Directed Graphs and Loop-Graphs 4
- 1.3 Important Types of Graphs 7
- 1.4 Operations on Graphs 8
- 1.5 Introduction to Graph Labelings 12

2 Magic and Super Magic Labelings **17**
- 2.1 Introduction 17
- 2.2 Theorems and Examples 22

3 The Place of Super Magic Labelings **33**
- 3.1 Relationship with Other Labelings 33
- 3.2 Counting 38

4 Operations on Graphs **41**
- 4.1 Magic Labelings of Unions of Graphs 41
  - 4.1.1 Main Result 41
  - 4.1.2 Results on 2-Regular Graphs 42
  - 4.1.3 Results on Forests 44
- 4.2 Crown Products of Some Super Magic Graphs 56
  - 4.2.1 General Results 56
  - 4.2.2 Super Magic Labelings of n-Crowns of 2-regular graphs 58

5 Deficiency **65**
- 5.1 Introduction 65
- 5.2 Graphs Whose Super Magic Deficiency is Infinity 66
- 5.3 The Super Magic Deficiency of Complete Bipartite Graphs . . 68
- 5.4 The Deficiency of Forests 72
- 5.5 Some Particular Families of Forests and 2-Regular Graphs . . 74

6 Results using additive number theory **81**
6.1 Magic Graphs and Sidon Sets 81
6.1.1 Introduction 81
6.1.2 Magic graphs containing a large clique 83
6.1.3 Embeding a clique in a large magic graph 84
6.2 Magic trees containing a given forest 87

7 Other Related Labelings **91**
7.1 Special Super Magic Labelings of Bipartite Graphs 91
7.1.1 Introduction 91
7.1.2 Special Super Magic and Super Magic Labelings, Chess boards, 1-Regular and 2-Regular Graphs 93
7.1.3 A Relation Between Super Magic Labelings of Graphs and Pseudo Graphs and Special Super Magic Labelings of Bipartite Graphs 97
7.2 Magical and Antimagical Product Labelings 105
7.2.1 Introduction 105
7.2.2 Product magic graphs 106
7.2.3 Product Antimagic Graphs 107
7.2.4 Product Edge-Magic Graphs 111
7.2.5 Product Edge-Antimagic Graphs 114
