

# Geoelectrical Characterization of Sulphate Rocks

Ander Guinea Maysounave

**ADVERTIMENT.** La consulta d'aquesta tesi queda condicionada a l'acceptació de les següents condicions d'ús: La difusió d'aquesta tesi per mitjà del servei TDX ([www.tdx.cat](http://www.tdx.cat)) ha estat autoritzada pels titulars dels drets de propietat intel·lectual únicament per a usos privats emmarcats en activitats d'investigació i docència. No s'autoritza la seva reproducció amb finalitats de lucre ni la seva difusió i posada a disposició des d'un lloc aliè al servei TDX. No s'autoritza la presentació del seu contingut en una finestra o marc aliè a TDX (framing). Aquesta reserva de drets afecta tant al resum de presentació de la tesi com als seus continguts. En la utilització o cita de parts de la tesi és obligat indicar el nom de la persona autora.

**ADVERTENCIA.** La consulta de esta tesis queda condicionada a la aceptación de las siguientes condiciones de uso: La difusión de esta tesis por medio del servicio TDR ([www.tdx.cat](http://www.tdx.cat)) ha sido autorizada por los titulares de los derechos de propiedad intelectual únicamente para usos privados enmarcados en actividades de investigación y docencia. No se autoriza su reproducción con finalidades de lucro ni su difusión y puesta a disposición desde un sitio ajeno al servicio TDR. No se autoriza la presentación de su contenido en una ventana o marco ajeno a TDR (framing). Esta reserva de derechos afecta tanto al resumen de presentación de la tesis como a sus contenidos. En la utilización o cita de partes de la tesis es obligado indicar el nombre de la persona autora.

**WARNING.** On having consulted this thesis you're accepting the following use conditions: Spreading this thesis by the TDX ([www.tdx.cat](http://www.tdx.cat)) service has been authorized by the titular of the intellectual property rights only for private uses placed in investigation and teaching activities. Reproduction with lucrative aims is not authorized neither its spreading and availability from a site foreign to the TDX service. Introducing its content in a window or frame foreign to the TDX service is not authorized (framing). This rights affect to the presentation summary of the thesis as well as to its contents. In the using or citation of parts of the thesis it's obliged to indicate the name of the author.

aldatzen gaituzten arren, ez dugu inoiz ahaztu behar  
nondik gatozen eta zeintzuk diren gure sustraiak*

*-Ander-*

The present work has been supported by the “Programa General d’Intensificació de la Investigació 2008-2011” (Generalitat de Catalunya-UB) and the Spanish Government Projects CGL2009-11096, CGL2009-07025 and CGL2010-18260.

During the elaboration of the thesis, the results have been published in different scientific journals:

*International Journals*

-Guinea A, Playà E, Rivero L, Himi M (2010) Electrical Resistivity Tomography and Induced Polarization techniques applied to the identification of gypsum rocks. *Near Surface Geophysics* 8: 249-257; *Impact Factor*: 0.989

-Guinea A, Playà E, Rivero L, Himi M, Bosch R (2010) Geoelectrical classification of gypsum rocks. *Surveys in Geophysics* 31(6): 557-580; *Impact Factor*: 3.590

-Guinea A, Playà E, Rivero L, Ledo JJ, Queralt P (2011 under revision) The electrical properties of calcium sulphate rocks. *Journal of Applied Geophysics*; *Impact Factor (2010)*: 1.185

*National Journals*

-Guinea A, Playà E, Rivero L, Salvany JM, Himi M (2009) Geoelectrical imaging supporting glauberite deposits evaluation in the Montes de Torrero area (Zaragoza). *Geogaceta*, 47: 145-148

The publications are included as annexes at the end of this volume. All the information and figures contained in the articles is present in the different chapters of this thesis. At the time of the finalization of this volume, there is another work in preparation to be submitted to an international journal:

-Guinea A, Playà E, Rivero L, Salvany JM (2011 in preparation) Geoelectrical Properties of Sodium Sulphates

Additionally, the results have been presented in the following meetings and congresses:

-Guinea A, Playà E, Rivero L, Himi M (2009) Prospecting alabaster quarries with electric imaging. *Asmosia IX* International Conference, Tarragona, June, 8-13

- Guinea A, Playà E, Rivero L, Salvany JM, Himi M (2009) Prospection of glauberite deposits with electrical resistivity imaging. *Spain-China Symposium on Geophysical and Geochemical Geosystems*, Zaragoza June, 22-25
- Guinea A, Playà E, Rivero L, Himi M (2009) Importance of gypsum purity in electric imaging. *EAGE Near Surface International Conference*, Dublin, September, 7-9
- Guinea A, Playà E, Rivero L, Salvany JM, Himi M (2009) Geoelectrical imaging supporting glauberite deposits evaluation in the Montes de Torrero area (Zaragoza). *47 reunión de la Sociedad Geológica de España*. Santander, November
- Guinea A, Playà E, Rivero L, Salvany JM, Himi M (2010) Caracterización de depósitos sulfatados mediante la técnica geofísica de la tomografía eléctrica. *1er Congreso Nacional de Minerales Industriales*, Zaragoza, May, 25-28
- Guinea A, Playà E, Rivero L, Salvany JM, Himi M (2010) Glauberitic formation identification with Electrical Resistivity Tomography technique. *72nd EAGE Conference & Exhibition incorporating SPE EUROPEC International Conference*, Barcelona, June, 14-17
- Guinea A, Himi M, Rivero L, Playà E (2010) Selecting electrical resistivity tomography arrays to define geological structures aimed by relative-sensitivity matrix. *EAGE Near Surface International Conference*, Zürich, September, 6-8
- Guinea A, Playà E, Rivero L (2011) Electrical response of Gypsum Rocks. *IUGG general assembly; Earth on the edge: Science for a sustainable planet International Conference*, Melbourne, June 28 - July 7
- Guinea A, Playà E, Rivero L, Himi M (2011) Geoelectrical properties of Calcium Sulphate Rocks. *EAGE Near Surface International Conference*, Leicester, September, 12-14

As this thesis has been elaborated as articles, every section is presented as a unit itself; with its own introduction, methods and results and discussion subsections. Due to that in some chapters there are lots of subsections, in their numbering the first number (corresponding to the current chapter) has been omitted in order to simplify them. Therefore, every subsection numbering begins with a dot which makes reference to the chapter; the chapter can be checked in the upper right corner of the even number pages.

## INDEX

1 SUMMARY (in catalan)	1
.1 Introducció	3
.1.1 Conceptes generals	3
.1.2 Objectius de la tesi	5
.2 Propietats elèctriques dels Sulfats	6
.2.1 Guix	6
.2.1.1 Treball de camp	6
.2.1.2 Assajos de laboratori	8
.2.1.3 Modelització	9
.2.1.4 Classificació de les roques de guix	10
.2.1.5 Interpretació del comportament elèctric de les roques de guix	10
.2.2 Anhidrita	11
.2.2.1 Treball de camp	12
.2.2.2 Assajos de laboratori	13
.2.2.3 Modelització numèrica	14
.2.2.4 Interpretació del comportament elèctric de les roques d'anhidrite	15
.2.2.5 Classificació de les roques de sulfat càlcic	16
.2.3 Glauberita	16
.2.3.1 Treball de camp	17

.2.3.2 Interpretació del comportament elèctric de les roques de glauberite	18
.2.4 Polarització induïda en sulfats	19
.3 Mètodes i limitacions	21
.3.1 Estructures en sulfats	21
.3.2 Triant el protocol de mesura	21
.3.3 Efectes de les heterogeneïtats en valors de transició	23
.3.4 Estudis en clorurs	25
.4 Exemples d'aplicació	26
.4.1 Dipòsit de guix a Pira (Tarragona)	26
.4.1.1 Introducció i mètodes	26
.4.1.2 Descripció geològica de l'àrea d'estudi	26
.4.1.3 Resultats i discussió	27
.4.2 Estudi de puresa a una pedrera activa	29
.4.2.1 Introducció i mètodes	29
.4.2.2 Descripció geològica de l'àrea d'estudi	29
.4.2.3 Resultats i discussió	30
.5 Conclusions	31
 2 ABSTRACT	 33
 3 INTRODUCTION	 39
.1 Evaporite rocks	41

.2 Geoelectrical prospection	44
.3 Objectives	47
4 ELECTRICAL PROPERTIES OF SULPHATES	49
.1 Gypsum	51
.1.1 Introduction	51
.1.2 Field examples	52
.1.2.1 Materials and methods	52
.1.2.2 Results and discussion	53
.1.3 Laboratory essays	60
.1.3.1 Materials and methods	60
.1.3.2 Results and discussion	63
.1.4 Theoretical models	66
.1.4.1 Materials and methods	66
.1.4.2 Results and discussion	69
.1.5 Geoelectrical classification of gypsum rocks	72
.1.6 Percolation theory and Hashin-Shtrikman bounds in gypsum rocks	75
.2 Anhydrite	79
.2.1 Introduction	79
.2.2 Field data	80
.2.2.1 Materials and methods	80
.2.2.2 Geological settings	82
.2.2.3 Results and discussion	84

.2.3 Laboratory essays	87
.2.3.1 Materials and methods	87
.2.3.2 Results and discussion	90
.2.4 Theoretical calculations	93
.2.4.1 Hashin-Shtrikman bounds for 3-phase systems	93
.2.4.2 Conductivity calculation: methods	95
.2.4.3 Conductivity calculation: results and discussion	98
.2.5 Geoelectrical classification of sulphate rocks	100
.3 Glauberite	102
.3.1 Introduction	102
.3.2 Field data	103
.3.2.1 Materials and methods	103
.3.2.2 Geological settings	104
.3.2.3 Results and discussion	106
.3.3 Geoelectrical classification of glauberite rocks	114
.4 Polarization of sulphate rocks	118
5 METHODS AND LIMITATIONS	121
.1 Structures in sulphates	123
.1.1 Introduction	123
.1.2 Theoretical models: methods	124
.1.3 Results and discussion	125
.2 Selecting the array	127

.2.1 Introduction	127
.2.2 Methods and theory	127
.2.3 Sensitivity analysis	128
.2.4 Examples	129
.2.5 Limitations	134
.3 Effects of heterogeneities in transitional values	138
.3.1 Introduction	138
.3.2 Transitional domain	138
.3.3 Other parameters affecting the conductivity of sulphate rocks	141
.4 Surveys in chlorides	142
.4.1 Introduction: electrical properties of chloride rocks	142
.4.2 Field examples: geological settings and methods	143
.4.3 Field examples: results and discussion	145
6 APPLICATION EXAMPLES	149
.1 Gypsum deposit in Pira (Tarragona)	151
.1.1 Introduction	151
.1.2 Materials and methods	151
.1.3 Geological settings	153
.1.4 Results	153
.1.5 Discussion	158
.2 Gypsum purity survey in an active quarry	163
.2.1 Introduction	163

.2.2 Materials and Methods	163
.2.3 Geological settings and quarried gypsum unit	164
.2.4 Results and discussion	167
7 CONCLUSIONS	171
.1 Electrical properties of sulphate rocks	173
.2 Methods and limitations	175
.3 Application examples	176
.4 Final conclusions	177

If you expect science to give all the answers to the wonderful questions about what we are, where are we going, what the meaning of the universe is and so on; then, I think you can easily become disillusioned and look for some mystic answers to this problem. Exploring, we try to identify as much as we can about the world. People say to me “are you looking for the ultimate laws of physics?” No I’m not. I’m just looking to find more about the world, and if it turns out there’s a simple ultimate law that explains everything, so be it; that would be very nice to discover. If it turns out it’s like an onion with millions of layer and we’re just sick and tired looking at the layers, than that’s the way it is. But whatever way it comes out, it’s nature, it’s there, and she’s gonna come out the way she is. Therefore, when we investigate we shouldn’t pre-decide what it is we are trying to do except to find more about it. And so altogether I can’t believe the special stories that had been made up about our relationship to the universe at a large because, they seem to be too local, too provincial. The earth; he came to the earth! One of the aspects of God came to the earth, mind you. And look what’s out there, how can it isn’t in proportion.

And also another thing; has to do with the question of how do you find something is true and if you have all these theories of the different religions and all different theories about a thing; then you begin to wonder once you start doubting, which I think is for me a very fundamental part of my soul to doubt, and ask. When you doubt and ask, it gets a little hard to believe. I can live with doubt, and uncertainty, and not knowing. I think it is much more interesting to live not knowing that to have answers which might be wrong. I have approximated answers, and possible beliefs, and different degrees of certainty about a different thing; but I’m not absolutely sure of anything and in many things I don’t know anything about. But I don’t have to know an answer; I don’t feel frightened by not knowing things, by being lost in the mysterious universe without having any purpose; which is the way it really is, as far as I can tell possibly

it doesn’t fright me.

Richard Feynman

“The uncertainty of knowledge”
