

# CONTENTS

---

## CHAPTER 1 - INTRODUCTION AND SCOPE

---

- 1.1 Introduction 3
- 1.2 Scope and Purpose of this thesis 12

## CHAPTER 2 - SYNTHESIS OF PHOSPHORUS OR SILICON-CONTAINING SPIROORTHOESTERS

---

- 2.1 Introduction 17
- 2.2 Objectives 25
- 2.3 Experimental procedures and results 27
  - 2.3.1 Microwave-Assisted Synthesis of a Novel Phosphorus-Containing Spiroorthoester, Characterization and Cationic Polymerization. 31
  - 2.3.2 Synthesis of a Novel Bis-Spiroorthoester Containing 9,10-dihydro-9-oxa-10-phosphaphenantrene-10-oxide as a Substituent: Homopolymerization and Copolymerization with Diglycidyl Ether of Bisphenol A. 47
  - 2.3.3 Novel Silicon-Containing Spiroorthoester with Combined Flame Retardancy and Low Shrinkage Properties to Modify Epoxy Resins. 69
  - 2.3.4 Copolymerization of a Silicon-Containing Spiroorthoester with a Phosphorus-Containing Diglycidyl Compound. Influence in Flame Retardance and Shrinkage 89

## **CHAPTER 3 - CROSSLINKING THROUGH SPIROORTHOESTERS AS PENDANT GROUPS**

---

**3.1 Introduction 105**

**3.2 Objectives 109**

**3.3 Experimental Procedures and Results 110**

**3.3.1 Phosphorylated Copolymers Containing Pendant, Crosslinkable Spiroorthoester Moieties. 115**

**3.3.2 Flame Retardance and Shrinkage Reduction of Polystyrene Modified with Acrylate Containing-Phosphorus and Crosslinkable Spiroorthoester Moieties. 133**

**3.3.3 Crosslinking of a Polyacrylate Bearing a Spiroorthoester Pendant Group with Mixtures of Diglycidyl Ether of Bisphenol A and Phosphorus-Containing Glycidyl Derivatives. 151**

## **CHAPTER 4 - MICROWAVE CURING OF A SPIROORTHOESTER-EPOXY SYSTEM**

---

**4.1 Introduction 169**

**4.2 Objectives 172**

**4.3 Experimental Procedures and Results 173**

**4.3.1 Microwave Accelerate Polymerization of 2-Phenoxymethyl-1,4,6-trioxaspiro [4,4] nonane with Diglycidyl Ether of Bisphenol A 177**

## **CHAPTER 5 – CONCLUSIONS 191**

---

## **CHAPTER 6 – APPENDIX: LIST OF ABBREVIATIONS 193**

---
