

Table of Contents

Chapter 1. Introduction and Scope

1.1. Chirality and Stereoselective Synthesis	2
1.2. Asymmetric Catalysis Applied to Hydrogenation Processes	4
1.3. Synthesis of Chiral Amines	10
1.3.1. Asymmetric Hydrogenation of Imines	10
1.3.2. Asymmetric Hydrogenation of Enamides	28
1.4. Scope of this Thesis	34
References	35

Chapter 2. *N*-Donor Ligands: Oxazoline and Imidazoline Ligands

2.1. Introduction	42
2.2. Results and Discussion	48
2.2.1. Thioether-Oxazoline Ligands	48
2.2.2. Phosphine-Imidazoline Ligands	54
2.2.3. Asymmetric Hydrogenation of Imines	66
2.3. Conclusions	72
2.4. Experimental Section	73
References	91

Chapter 3. P-Donor Ligands: Xylose- and Mannitol-based Ligands

3.1. Introduction	96
3.2. Results and Discussion	107
3.2.1. Xylose-based Ligands	107
3.2.2. Mannitol-based Ligands	112
3.2.3. Asymmetric Hydrogenation of Imines	131
3.2.4. Asymmetric Hydrogenation of Enamides	144
3.3. Conclusions	150
3.4. Experimental Section	151
References	168
Summary and Evaluation	173
Resum	175
