

Table of contents

<i>Chapter 1. Introduction and scope</i>	1
1.1. General introduction to zeolites	1
1.2. Properties and uses of zeolites	4
1.3. The N ₂ and O ₂ separation process	6
1.4. Acid catalysis	16
1.4.1. Isomerisation of styrene oxide to phenylacetaldehyde	18
1.5. Scope of this thesis	21
1.6. References	23
<i>Chapter 2. Experimental section</i>	29
2.1. Sample description and preparation	29
2.1.1. Sample description	30
2.1.2. Sample preparation	34
2.2. Sample characterization	36
2.2.1. Determination of surface area by N ₂ physisorption	36
2.2.2. X-ray diffraction (XRD)	37
2.2.3. Magic angle spinning nuclear magnetic resonance (MAS NMR)	39
2.2.4. Fourier transform infra red spectroscopy (FTIR)	41
2.2.5. Ultra violet- visible spectroscopy (UV-Vis)	43
2.2.6. Temperature programmed desorption (TPD)	44
2.2.7. X-ray fluorescence spectroscopy (XRF)	44
2.2.8. Elementary analysis	45
2.2.9. Cation exchange capacity (CEC)	45
2.3. Adsorption and catalytic experiments	46
2.3.1. Adsorption experiments	46
2.3.2. Catalytic experiments	47
2.4. References	49

<i>Chapter 3. Nitrogen and oxygen separation</i>	53
3.1. Study of the influence of several mordenite modifications on its N₂ and O₂ adsorption properties	55
3.1.1. Introduction	56
3.1.2. Experimental section	58
3.1.3. Results and discussion	62
3.1.4. Conclusions	72
3.1.5. Acknowledgements	73
3.1.6. References	73
3.2. Influence of the Ag⁺ location on the N₂ and O₂ adsorption properties of several Na/Ag-A zeolites	76
3.2.1. Introduction	77
3.2.2. Experimental section	79
3.2.3. Results and discussion	81
3.2.4. Conclusions	91
3.2.5. Acknowledgements	92
3.2.6. References	92
<i>Chapter 4. Styrene oxide isomerisation</i>	95
4.1. Isomerisation of styrene oxide to phenylacetaldehyde by fluorinated mordenites using microwaves	97
4.1.1. Introduction	98
4.1.2. Experimental section	100
4.1.3. Results and discussion	103
4.1.4. Conclusions	114
4.1.5. Acknowledgements	115
4.1.6. References	115
<i>Chapter 5. FT-IR characterization</i>	117
5.1. An FT-IR study of the adsorption of CO and nitriles on Na-Mordenite: evidence of a new interaction	120
5.1.1. Introduction	121
5.1.2. Experimental	122
5.1.3. Results and discussion	124
5.1.4. Conclusions	144
5.1.5. References	146

5.2. A reexamination of the adsorption of CO and nitriles on alkali-metal- mordenites: characterization of multiple interactions	149
5.2.1. Introduction	150
5.2.2. Experimental	152
5.2.3. Results	153
5.2.4. Discussion	172
5.2.5. Acknowledgements	175
5.2.6. References	176
5.3. FT-IR Study of the adsorption of carbon monoxide and of differently hindered nitriles on Na-Faujasites: a confirmation for the formation of complex interactions	179
5.3.1. Introduction	180
5.3.2. Experimental	182
5.3.3. Results	183
5.3.4. Discussion	194
5.3.5. Conclusions	201
5.3.6. Acknowledgements	203
5.3.7. References	203
<i>Chapter 6. Conclusions</i>	207
Resum	211
